Email: knelli@caltech.edu

Mobile: 847-494-5028

SKILLS SUMMARY

- **Languages:** C/C++11-20, Python, Bash, Perl, Mathematica
- **Software:** SpECTRE, VSCode, L^AT_EX, GNUPlot, VisIt, Paraview, Blender
- **Tools:** GIT/GitHub, Docker/DockerHub, Make, CMake, LLVM, GCC, GDB, HPCToolkit, SLURM
- **Parallelism:** Charm++, MPI, OpenMP
- **Platforms:** Linux (Ubuntu, Mint, CentOS, RedHat), Windows, MacOS

EXPERIENCE

- **Teukolsky Group, Caltech** November 2020 - Present
Graduate Research Assistant
 - Member of Simulating eXtreme Spacetimes (SXS) collaboration (150+ people, 8+ institutions).
 - Updated and significantly reduced complexity of control loops in MPI-based Spectral Einstein Code (SpEC).Lead SpECTRE Developer/Engineer (500k+ lines of C++ 20)
 - Open-source software designed to run highly accurate simulations of binary black hole mergers and general relativistic magneto-hydro dynamics on HPC and exascale machines.
 - Utilized task-based (asynchronous) parallelism to achieve **3x speedup** when solving partial differential equations on exascale computing resources.
 - **Visualized ~1TB** of output from simulations using Paraview and its Python scripting framework.
 - Implemented detailed memory diagnostics. **Reduced memory usage by 5x** and found three bugs.
 - Designed and oversaw five student projects. Mentored undergraduate, masters, and other doctoral students.
- **Shapiro Group, University of Illinois Department of Physics, REU** May 2018 - July 2020
Undergraduate Researcher
 - Created visualizations of numerical simulations of black hole and compact star mergers.
 - Wrote novel code in Python and C++ (27k+ lines) to automate visualization using VisIt software and Blue Waters supercomputer.
- **Dr. Christopher Powell, Argonne National Laboratory Internship** May 2017–July 2017
Undergraduate Researcher
 - Utilized Advanced Photon Source (X-rays) to record fuel injector spray patterns.
 - Generated novel Python scripts to analyze experimental data for start of injection time; implemented visualizations with Blender software.

EDUCATION

- **California Institute of Technology (Caltech), CA** August 2020 - Present
Doctorate of Philosophy: *Physics*
- **University of Illinois Urbana-Champaign, IL** August 2016 - May 2020
Bachelor of Science: *Engineering Physics, Highest Honors*
Bachelor of Science: *Astronomy, Summa Cum Laude and with High Distinction*

PRESENTATIONS

- “The SpECTRE CCE Module”, North American Einstein Toolkit Workshop, June 3 2024, Baton Rouge, LA
- “Horizon Tracking in SpECTRE with Task-Based Parallelism”, April APS Meeting, April 3 2024, Sacramento, CA
- “Horizon Tracking in SpECTRE with Task-Based Parallelism”, Pacific Coast Gravity Meeting, March 1 2024, Santa Barbara, CA
- “Cauchy-Characteristic Matching in SpECTRE”, April APS Meeting, April 16 2023, Minneapolis, MN
- “Cauchy-Characteristic Matching in SpECTRE”, Pacific Coast Gravity Meeting, April 1 2023, Caltech, CA
- “SpECTRE, Numerical Relativity Community Summer School 2022”, Numerical Relativity Community Summer School, Aug. 11 2022, ICERM at Brown University, MA
